

Juke Box E

“All-in-one Plug & Play“ turntable system + BT + line

- Instant playback with super-easy setup
- Bluetooth and 1 line input
- High contrast display on top
- Line record output
- Gold plated sockets
- Pre-adjusted tracking force & anti-skating force
- Ortofon OM5e cartridge, pre-mounted
- 8,6" aluminium tonearm with sapphire bearings
- Belt drive with silicone belt
- Low vibration synchronous motor & DC power supply
- Special feet for effective decoupling
- Acrylic lid included
- IR remote control included
- Colour options: HG Black, HG White, HG Red

Power output	2 x 50 watts (4 ohms)
Outputs	Speakers, Line out (fixed), Phono out
Inputs	Bluetooth (2.1, EDR), 1x line (analogue)
Speed	33, 45 (manual speed change)
Principle	belt drive
Speed variance	33: 0,8% 45: 0,7%
Wow & flutter	33: 0,29% 45: 0,27%
Platter	300mm plywood with felt mat
Main bearing	stainless steel in bronze bushing
Tonearm	8,6" aluminium
Effective arm length	218,5 mm
Overhang	22,0mm
Effective tonearm mass	8,0gr
Counterweight for mass	3 - 5,5g (included)
Tracking force range	0 - 25mN (OM5e 18mN pre-adjusted)
Included accessory	power supply, dust cover, remote control
Power consumption	4,5W max
Dimensions	415 x 118 x 334mm (WxHxD)
Weight	5 kg net

“All-in-one Plug & Play” turntable system with Bluetooth, line input & easiest possible set-up!

Juke Box E is record player, phono stage, Bluetooth receiver, line pre-amplifier and power amplifier in one, requiring only a pair of speakers to make a complete system. If you thought that a starter turntable system is complicated to set up, *Juke Box E* proves the contrary. This good sounding belt-drive deck offers the fastest possible installation process because it comes pre-adjusted out of the box and offers superb sound quality.

Tracking force and anti-skating of the turntable section are carefully pre-set. An acrylic dust cover is included. The “All-in-one turntable system” is available in high-gloss black, red or white colour.

Juke Box E - just add speakers!

With the its full range of **analogue and digital inputs**, Juke Box E becomes one of the most versatile offerings on the market. A **turntable**, a **preamplifier**, a **power amplifier** and a **Bluetooth receiver** as a good looking and audiophile one-box-solution!

The **Line output** even lets you relay the signal to a further amplifier, such as the Head Box S2, to become an even completer setup.

The built-in **high contrast display** always tells you what volume-setting you are listening at and what input currently is in use. So you always know what's happening.

The 32-step digital **potentiometer** gives you perfect feedback and allows you to fine-tune to your desired volume. Pressing the volume knob switches between the available inputs. For further convenience an infrared **remote control** is included!

Why would the forefront of analogue HiFi offer an all-in-one turntable?

Turntables and the analogue experience have gained in popularity the last few years, many people are searching for a true and simple plug-and-play solution. A lot of products have been introduced to the market which are supposed to end this search, though there have only been two solutions so far, which in our opinion still are not adequate to enjoy the full potential of analogue players.

The most popular probably is a plastic turntable with built-in speakers. Those are mostly made in far-east with cheap construction and toy-like build quality. These products are very far from the analogue sound as it is supposed to be, they even are close to destroying your valuable records. The built-in speakers also cause lots of vibrations which are picked up from the cartridge, the outcome is a very distorted and boomy sound. On top of that, you won't get close to a real concert-like stereo feeling, as the speakers are too close to each other to form a room-like sound stage.

A better way would be to add active speakers, but the problem here is that the cable from the turntable to the speakers can be maximum 1.2 meters. This again causes many distortions and a coloured sound. With the short distance between the speakers of approximately 2 meters you will also not create a stereo effect. If you would like to add a second source, like a CD player or even your smartphone, you will very likely come into difficulties with the cabling.

We believe that the only true solution to this request is our Juke Box E. It offers built-in pre and power-amplifier, which allows you to place the speakers far away from each other to minimize the possibility of acoustic feedback and to create a real analogue stereo experience.

With Juke Box E we want to show all vinyl enthusiasts and growing audiophiles, how easy and great a music experience from a modern record player can be!

Important side-note: if you plan to use the speakers and the turntable on the same shelf, it is recommended to use isolation feet like Damp-it (pictured above)
