

## This is a High End music system

**Top class listening experiences have never been easier to live with than with SA legend 40 silverback.**

- \* Digital Wireless Speaker
- \* Sound in impressive HD quality
- \* Extremely easy to use
- \* Fills the living room with sound
- \* Easy to place
- \* 7 years factory warranty

The speakers turn themselves on when you pick up your mobile phone and start the music. The 8 built-in amplifiers are ready for any challenge you have in mind.

Should it be rock, jazz or something else?

The speakers' built-in wireless network connects the devices with each other automatically. You don't have to do anything. The signal is transmitted in High Definition, so you do not miss a single musical nuance.

This is how simple living can be with top class listening experiences.

Two speakers and a smartphone. That's all you need.

### **The speakers are a wireless High End music system**

We have digitized and optimized all the functions that previously required cables and equipment, and replaced them with intelligent and integrated technology inside the speaker. In this way, we have elevated the listening experience to a new level.

You can of course connect TV, record player, CD and other devices to the system. They simply connect to the small wireless hub.

Welcome to an era where great user friendliness finally meet great listening experiences.
