

VC-S2 ALU & VC-E

Record cleaning machines

MSRP **VC-S2 ALU** 529 € (incl. VAT) - **VC-E** 419 € (incl. VAT)

The VC-E and VC-S2 ALU take record cleaning to new levels. They feature an aluminium outer surface, which is able to withstand fluid spill without compromising the chassis.

They are super powerful and clean records in as little as one or two rotations. The very best results are achieved with one rotation forward followed by one backwards. Their drive motor is very fast, at around 30rpm, which is roughly three times faster than comparable cleaning machines. The result is a much faster and more effective cleaning process.

A clamp protects the record label from cleaning fluid and avoids damage on the label, while still securing the record in place. The robust metal arm is easy to use, mechanically stable and focuses all suction power directly onto the record surface.

A large internal container collects used fluid and is effortlessly easy to empty. When using Wash-IT cleaning solution, the fluid will also evaporate in the container, meaning the container will almost never need to be emptied. Our eco-friendly and non-alcoholic vinyl cleaning concentrate, Wash-IT, offers very good cleaning results and reduces static charge, so record wear and stylus wear are significantly reduced.

The aluminium enclosure of the VC-E and VC-S2 ALU exemplifies the high-end build-quality, and makes your new record cleaner a long-lasting investment. With many practical features and excellent mechanical operation, these new cleaners effectively combine industrial design appeal with an easy solution to great sound from your vinyl records.

VC-S2 ALU

- Increased size for quieter operation and improved handling of the record and cleaning liquid application processes.
- Excellent cleaning and vacuum capabilities with improved motor drive system for increased lifetime.
- Bigger 2.5l waste tank that will not need to be emptied even after cleaning thousands of records.
- Better aluminium clamp to secure the record and protect the label.

VC-E

- Compact, yet affordable cleaning system.
- Excellent cleaning and vacuum capabilities.
- Integrated 0.5l waste tank for used cleaning fluid.
- Plastic clamp to secure the record and protect the label.
