

Argon3LS

Argon3LS is a floorstanding version of the highly respected Argon3S bookshelf speaker. Argon3LS combines the midrange detail and speed of the best monitor-speakers with the added weight and bass extension - thanks to the higher cabinet volume of a floorstander. They provide exquisite listening pleasure, revealing details and nuance that you previously have never heard before, even in recordings that you thought you already knew by heart. Argon3LS floorstanders allow you to experience movies and music the way the producer and artist intended it.

Technical specifications

Operating principle	Two-way, passive radiator
